B. Because we feel warm when we see red things.

C. Because red colour makes the place warm.

5. Generally, how many groups are colours divided into? A

A. Only two.

B. More than two.

C. At least twelve.

COMPLETE THE PASSAGE

In general, colours are divided into two groups: warm and cool colours. Psychologists believe that there are also two groups of people: one group prefers warm colours and the other prefers cool colours.

The warm colours are red, orange, and yellow. People think that such colours are exciting and sociable people like them because they are warm-hearted. When people are in places with warm colours, they usually want to be active. Researchers say that time seem to pass more slowly in a room with warm colours than in a room with cool colours.

Homework

1. Listen and repeat.

2. Draw something warm and cool. Write the words and talk about them with your partner.

画出生活中温暖的和凉爽的东西
(至少三种)，标上单词，和同伴说一说。
