一、阅读理解。

A

In the future, people will have their own robots. They are just like humans. They'll help us do the housework and do the most difficult work. They'll be very important in our life.

Scientists believe that they will try their best to make robots look like us. Now lots of foreign companies(公司) have already made robots walk and dance.

But some of the scientists think that it will be difficult for a robot to do the same things as a real person.

If we can make a robot like a person, we'll have more free time. Maybe the dream will come true.

You'll see a new doctor at a hospital near London if you go there. He's very smart but he never speaks and he didn't go to medical school. He can work all day long without rest. He's one meter tall and has a face like a TV screen. He has no arms or legs but lots of buttons(按钮). He is named Dr. Robot.

Doctors often need to ask their sick(生病的) persons some questions. But busy doctors can only spend a few minutes with each of them. The robot doctor,

however, can ask a sick person questions for an hour if necessary. So when the human doctor meets his sick person, he already has a lot of helpful information. Dr. Robot is quite human. If you answer “No” to the question “Do you like smoking?” Dr. Robot will answer, “I’m glad to hear that.” Robot doctors help human doctors a lot in their medical work. But they will never take the place of human doctors.

根据短文内容,回答下列问题。

1. Does the robot doctor look like a human doctor?

2. What does the robot doctor look like?

3. What does the underlined word “human” mean in Chinese?

4. How long can busy doctors spend with each of their sick persons?

5. What doesn't Dr. Robot like people to do?
