## 拓展提能

### 四、阅读理解。

#### **Everyone Is Unique**(唯一的)

There is nobody in the world that is exactly like you. You are unique! Everybody is different from others. That makes the world interesting. There are people who are taller than you. Maybe your hair is the same color as your friend's, but perhaps yours is longer than hers. Another difference is that your hair may be straight and hers may be curly.

I am sure you have friends who are smarter than you. And you also have friends who are as good at sports as you. But there are also people around you who are not good at these things. However, you can also become good friends.

So shout to the world, “I am who I am—I am unique!” It takes all sorts (各种各样) to make a world.

根据短文内容,判断句子正(T)误(F)。

- (  ) 1. No two persons in the world look exactly the same.
- (  ) 2. Only those who have the same interests can make friends.
- (  ) 3. No one likes to have friends who are smarter than him.
- (  ) 4. Twin sisters may be different in some ways.
- (  ) 5. Different people make our world colorful.
