1. The dog is \_\_\_\_\_. You should throw it away.
2. Mother gives me love and \_\_\_\_\_.
3. Not only her parents but also she \_\_\_\_\_ traveling.
4. The sign warns us \_\_\_\_\_ careful.

## 拓展提能

### 四、任务型阅读。

根据短文内容,回答下列问题。

The sun is always shining. But it can only shine on one side of the earth at one time. When the sun is shining on one side of the earth, it is night on the other side. At night, you can see the stars. The stars are in the sky all day. But the light from the sun is so bright that you can't see them. When night comes, there is no light, and the stars are bright enough to see. The stars look very small. But some of them are

even bigger than the sun. They look small because they are so far away from you. Big things look much smaller when they are far away. The sun is closer to the earth than other stars, so it looks bigger.

1. Can the sun shine on only one side or two sides of the earth at one time?

---

2. Are the stars in the sky all day?

---

3. When are the stars bright enough to see?

---

4. How do big things look when they are far away?

---

5. Why does the sun look bigger than other stars?

---

---
