## 二、(六安市轻工中学模拟卷)阅读理解。

The purpose of students who come to school is to study. But studying needs right ways, or we would

waste the time or the money. The followings are ways for studying.

The best time for reading is morning. Because in the morning, the air is fresh and our minds are clear. For that reason, we can get good results.

When we study we must be patient. If we don't understand a text well, we must read it again. We should not read the next until we have learned the first one well.

When we are studying, we must put our hearts into the book. We cannot read absent-mindedly(心不

在焉地), or we could get nothing from the book while we are reading.

We must always ask “why”. If we can't understand well, write it down and ask our teachers or parents, brothers or friends, in any possible ways. We must know it completely and then our knowledge can be used well.

Though there are many ways for studying, however, the above mentioned(提到的) will be helpful if we can keep them in heart.

**三、根据短文内容填写表格。(每空一词)**

A different way of learning is widely used in our English study. Before class, we make study plans first. Then we look up the new words, listen to the recording and read the text. When we meet problems, we can't solve by ourselves. We always write

them down in our notebooks.

In class, we sit in groups to discuss the problems freely. The teacher always offers help when we need. After discussion, it's time for us to give a report to the class. We also make conversations in pairs and practice a lot. It's really good for our listening and speaking.

After class, we have less homework now so we can go to the library to read English books, magazines and newspapers. We can also surf the Internet for useful information.

In a word, we enjoy the new way of studying.  
We can make more progress in our study.
